

PRESS RELEASE

Oct. 8th.2014

NORMAN COMPANIES AT THE INTERNATIONAL WORLD NUCLEAR EXHIBITION ALONGSIDE NUCLEOPOLIS

From 14 to 16 October 2014, the Nucleopolis cluster will be present at the first **World Nuclear Exhibition (WNE)**, to be held at Paris (in Le Bourget).

Stand n° C 50

14-15-16 OCT. 2014
Paris - Le Bourget

Over a shared space of 200 m², Nucleopolis will welcome 17 companies from the nuclear industry and 2 Norman associations: Sotraban and Energies Haute Normandie.

The companies which wanted to attend the exhibition, alongside Nucleopolis, include those based in the Cotentin area such as EFINOR, AEMCO, OREKA, NUDEC and FIVA, companies from Calvados department such as SOMINEX, PANTECHNIK, PIERCAN and TRAVYL, as well as companies from Upper Normandy, and even outside Normandy.

The vocation of **Nucleopolis, the Norman nuclear cluster for health and energy**, is to promote the economic development of the nuclear industry in Normandy, and therefore employment, by **enhancing the competitiveness of its member companies**.

This support involves developing skills and innovation as well as participating in business-oriented exhibitions - like the WNE- in order to showcase the know-how of the SMEs and allow them to access new markets.

WNE also highlights the use of **nuclear technologies in healthcare** and has asked Nucleopolis to focus on this theme for the exhibition through a dedicated space on the Nucleopolis booth (C50-D49) and a round table, organised under its direction: a tremendous opportunity to promote Normandy's numerous assets in the field.

During the 3 days at the WNE, Nucleopolis, the reference regional player for the nuclear industry in the fields of Energy and Health, will act as **ambassador of Normandy excellence** in the nuclear domain.

For full details about the WNE: www.world-nuclear-exhibition.com

For full details about Nucleopolis at the WNE: read Nucleolien No. 10, WNE special issue (www.nucleopolis.com): header documentation then Nucleolien).

MORE ABOUT NUCLEOPOLIS

Around internationally renowned players such as AREVA, CEA, CNRS, EDF and GANIL, the Nucleopolis cluster **federates the industrial, training and research skills** available in Normandie, across the entire value chain of nuclear sciences **in the fields of energy and health** and in the transverse field of **risk management**.
